

Twister

A simple adjustable odour neutraliser for small areas, where quick, safe and long lasting deodorisation is required.

Using natural oils to neutralise malodours, Twister dispenses a dry vapour through the replaceable disc system. It is completely safe, spill proof and non-toxic, making Twister ideal for use in a variety of applications. Twister is superior to gels and sprays and the benefits will last for up to 30 days.

Typical applications for Twister include, vehicles, rest rooms, mobile homes, caravans and areas where animals are present.

Suparoma

Suparoma is designed for use in larger commercial and public areas, dispensing a deodorising dry vapour with a choice of natural oil-based fragrances selected to enhance the ambience of any public space.

The biodegradable aroma cubes are manufactured from 100% COSHH approved natural oils. Holding up to 8 cubes in the unique twisting holder, the Suparoma is designed to dispense its' fragrance over a longer period than traditional units.

Recommended installations include larger public areas, corridors, large lounge areas, schools, clubs, hotels and shops, anywhere where there is a need to create a relaxing ambience or even to counter specific malodours.

A built-in timer with 8 timing options optimises the dispensing time for each Suparoma unit, delivering the required level of fragrance without wasting the natural oil cubes.

Measures 210mm (h) x 255mm (w) x 130mm (d)

- Wall mounted
- Available in white/stainless steel or unpainted to apply your own colour
- Mains powered
- Provides higher output for larger areas
- Choice of 20 fragrances
- 8 timing options optimises the dispensing time
- Anti-Vandal Covers
- Anti-Ligature
- Up to 12 week service frequency

Purazone

Purazone uses UVC radiation to destroy 99.99% of airborne bacteria, viruses, spores and moulds.

Purazone also destroys VOC's (Volatile Organic compounds), so will dramatically reduce malodour and protect staff.

The secret to the success of Purazone is the design of the UVC light system, developed in conjunction with Phillips Lighting to slow down the passage of air as it passes over the high velocity UVC lamps, creating a maximum kill exposure time.

In addition to killing airborne bacteria and viruses, Purazone uses essential natural oils to release a non-toxic dry vapour, designed to neutralise unpleasant and offensive odours.

The Purazone air purifier system is ideal for hospitals, nursing homes, clinics, mortuaries and funeral directors.

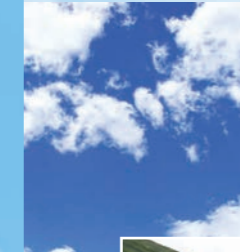

The unique baffle system means that no harmful UVC rays escape from the Purazone unit, which is safe to use in all areas including those used by patients.

Measures 455mm (h) x 475mm (w) x 150mm (d)

- Wall mounted or free standing
- Stainless steel case
- Mains powered
- Independently laboratory tested
- Low noise levels for sensitive areas
- Choice of 20 fragrances
- Requires an annual service
